Vikas Gholap

Data Scientist — Machine Learning Engineer — AI/ML & Android Developer
Aurangabad, Maharashtra, India | +91-88579-78314 | vikasbgholap27@gmail.com | github.com/VikasGholap06 | linkedin.com/in/vikas-gholap

Professional Summary

Aspiring Data Scientist with hands-on experience in data analysis, statistical modeling, and machine learning using Python, Pandas, NumPy, and SQL. Experienced in building dashboards and ETL pipelines with Power BI (DAX, Power Query, data modeling), and applying Computer Vision (OpenCV, YOLO) and NLP (BERT, Transformers) to real-world problems. Strong foundation in statistics, data mining, data warehousing, DSA, and OOP. Solved 500+ LeetCode and GFG problems. Delivered award-winning hackathon and academic projects, including a 1st-place national-level Android application.

Technical Skills

Programming Languages: Python, SQL, Java, Kotlin, C++, PHP

Data Science & Analytics: Pandas, NumPy, Scikit-learn, Matplotlib, Statistics, Hypothesis Testing, Data Mining, Data Warehousing, ETL, Exploratory Data Analysis (EDA), Feature Engineering, Power BI (DAX, Power Query, Data Modeling

Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Artificial Intelligence / Machine Learning: Machine Learning, Computer Vision, Natural Language Processing (NLP), Generative AI, YOLO, ML Kit, OpenCV, BERT, Transformers

Android Development: Android SDK, Jetpack Compose, XML, MVVM Architecture, LiveData, Coroutines, CameraX

Backend & APIs: Firebase, Retrofit, OkHttp, Volley, REST APIs, Google Maps API, OpenStreetMap API

Databases: SQL, Firebase Realtime Database, Firestore, Room, SQLite

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, Android Studio, Figma

Professional Experience

Yug-Yatra Retail Pvt. Ltd. Remote
Software Developer Intern *Feb 2026 – Apr 2026*
- Developed and shipped Android application features using Kotlin, Jetpack Compose, and Firebase, supporting the core user-facing product.
- Built reusable UI components in Jetpack Compose, improving development consistency across modules.
- Integrated Firebase services (Authentication, Firestore, Cloud Storage) for real-time data sync and secure user sessions, and optimized performance through code and query refactoring.

Mountreach Solutions Amravati, Maharashtra
Android Developer Trainee *May 2023 – Jul 2023*
- Trained in core Android development fundamentals: Activities, Fragments, Lifecycle management, and XML-based UI design.
- Built sample applications using SQLite for local storage and structured queries, REST APIs for network calls, and Firebase for backend integration.

Projects

CITY-FLUX – Smart Traffic & Parking Management System github.com/Huzaifpathan/CityFlux
Python, Java, Kotlin, Firebase, OpenCV, YOLO
- Built a real-time traffic and parking management system using YOLO-based vehicle detection and OpenCV image processing to generate structured vehicle-count and occupancy data.
- Implemented incident reporting, automated police-assignment workflow, and live Firebase-backed monitoring dashboards for real-time data visualization.

NEWS-CLASSIFICATION – BERT-Based NLP Model Google Colab Notebook
Python, Pandas, BERT, Transformers, Scikit-learn, Gradio
- Preprocessed the AG News dataset with Pandas and Scikit-learn, trained a BERT-based text classification model, evaluated it on accuracy/precision/recall, and deployed a Gradio interface for real-time inference.

AGEWELL – Elder Care Application (1st Place, National-Level Project Competition) github.com/VikasGholap06/AgeWell
Java, Kotlin, Firebase, MVVM, OpenStreetMap API
- Developed an elder-care Android application with SOS emergency alerts, medication reminders, and hospital mapping using MVVM architecture.
- Integrated OpenStreetMap API for real-time hospital mapping and Firebase for push notifications and live data sync; won 1st place nationally.

SNAPEAT – AI-Powered Nutrition Data Tracking App github.com/VikasGholap06/SnapEat
Java, Kotlin, ML Kit, Firebase, REST APIs
- Built an AI-powered nutrition app combining image-based food recognition, barcode scanning, and nutrition API integration; used Pandas/NumPy to aggregate logged data into daily summaries.

Education

Government College of Engineering, Chhatrapati Sambhajinagar Maharashtra, India
B.Tech., Computer Science & Engineering (AI & ML Honors) – CGPA: 9.12/10 *2024 – 2027*

Government Polytechnic, Ambad Jalna, Maharashtra, India
Diploma in Information Technology – Percentage: 92.94% *2021 – 2024*

Achievements

- 1st Place – National Level Project Competition, for the AGEWELL elder-care Android application.
- 3rd Place – Wings Hackathon, Government College of Engineering, Chhatrapati Sambhajinagar.
- 3rd Place – Wings Innovex Project Competition, Government College of Engineering, Chhatrapati Sambhajinagar.

Certifications

- Power BI for Beginners – Simplilearn
- NPTEL – Deep Learning for Natural Language Processing (NLP)
- NPTEL – Soft Skills
