Summary

• **Android Developer | Full Stack Developer** - Skilled in Java,Kotlin, Jetpack Compose, and Firebase, building scalable and user-centric mobile apps. Passionate about real-time databases, API integration, and AI/ML-powered solutions.Focused on innovation, performance, and seamless user experience.

Skills

• **Languages**- Java, Kotlin, Python, PHP, SQL

• **Mobile App Development**- Android SDK, Jetpack Compose, Kotlin Coroutines, MVVM, XML, LiveData, Navigation Component, Material Design, UI/UX

• **API & Backend Development**- OkHttp, Retrofit, Volley, REST APIs, FCM (Firebase Cloud Messaging), Google Maps API,

• **Cloud & Database Technologies**- Room DB, SQLite, Firebase Realtime Database, Firebase Firestore, SharedPreferences

• **Development & Collaboration Tools**- Git, GitHub, Figma, Unit Testing,Beta Testing, Data Structures and Algorithm's

Experience

• **Android Developer, Training** **Mountreach Solutions** ***Amravati, India*** **05/2023 - 07/2023**

Explored Android SDK, local databases (SQLite, Room DB), and UI development with XML. Learned key concepts like Activity Lifecycle, Fragments, and UI Components. Gained hands-on experience with API integration, Location Manager, and Android Studio's file structure. Developed Android applications to strengthen core development and debugging techniques.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

• Government College of Engineering , Chhatrapati Sambhajinagar,India **Pursuing** CGPA: 9.27 08/2024 – 06/2027

Diploma, Information Technology

• Government Polytechnic Ambad, Maharashtra, India Percentage: 92.94% 06/2021 – 06/2024

• 10th Jijamata Vidyalay Pirkalyan , Jalna Percentage: 84.20% 2021

Projects

• **AGEWELL -Elder Care App** GitHub : Built a health monitoring app with SOS alerts, medication, and real-time hospital mapping using FCM, Firebase, and OpenStreetMap API. Developed with Kotlin, Java, and MVVM for seamless user experience.

• **SNAPEAT - Nutrition tracking app** GitHub : Developed a nutrition tracking app integrating Java, Kotlin, Google ML Kit, Spoonacular API, USDA API, OpenFoodFacts API, and Firebase to calculate protein, carbs, fat, and energy (kcal) from food images or barcodes, with features for meal planning, water tracking with reminders, and personalized user logs.

• **EMO-MIRROR - Emotion detection App** GitHub: Built a real-time face emotion detection app using Java, Google ML Kit Vision API, and CameraX, featuring on-device secure analysis with confidence scoring, emotion breakdown (happy/neutral/sad), motivational tips, session statistics, and interactive progress visuals.

• **STUD-HELPER - Student Helper App** GitHub: Developed an Android app in Java with Firebase to help students build resumes, manage timetables, create to-do lists, scan ,share and summarize notes via OpenRouter API, assignments, set reminders, and calculate CGPA.

Achievements

National Level Project Competation : 1st Place Winner at National Level Project Competition, organized by Prof. Ram Meghe Institute of Technology and Research, Amravati – Developed AgeWell App

Wings Hackathon: 3rd Winner at Wings Hackathon organized by Government College of Engineering Aurangabad ,India

Certifications

• **Android Developer**: Mountreach Solutions PVT ltd. • **NPTEL**: Soft Skills • **Simplilearn |SkillUp**: Power Bi for Biginners
